

BayTech Data Switch Series

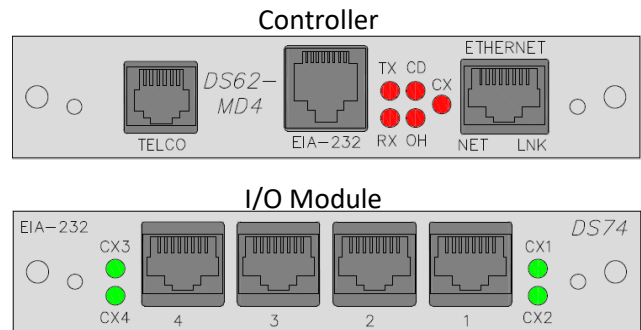

Data Switch for IP Consolidation

The DS-Series serves as an IP concentrator eliminating the need for an IP address per managed power strip. This provides considerable short and long term savings for data centers with smart power strips by:

- Managing multiple power strips with one IP
- Eliminating the need for supporting network hardware
- Eliminating Yearly Maintenance Cost per IP by \$100 - \$400

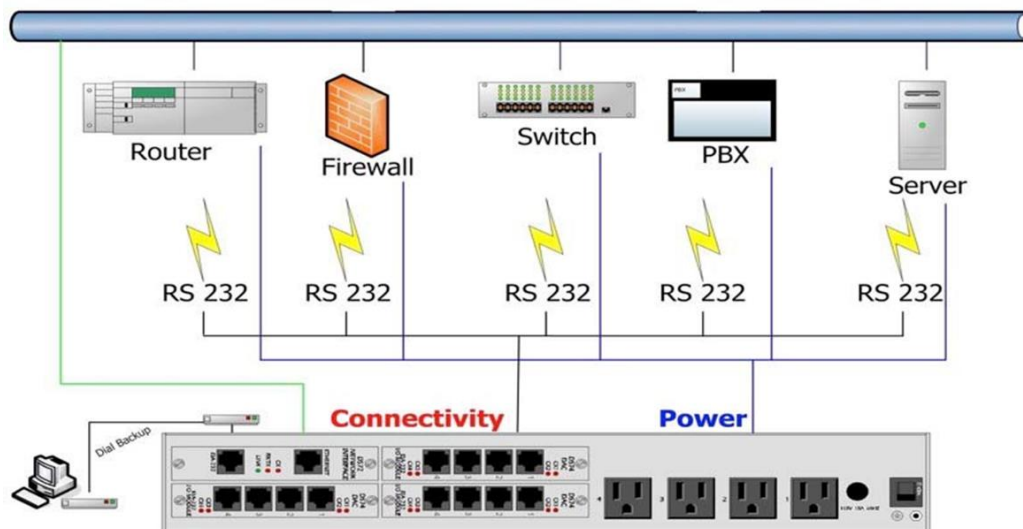

This product has **3 models** that comes in 4-port modular design increments:

- DS3 – one controller module and 2 I/O Modules (8 ports)
- DS6 – one controller module and 5 I/O Modules (20 ports)
- DS9 – one controller module and 8 I/O Modules (32 ports)

DS-RPC – Remote Location Manager

Console access and power control in the same unit provides a system engineer virtually complete control of remote locations.
