- All Series Types (MMP, MRP, MSP, MDP, ATS, DS)
- Any Input Plug Type
- Any Network Interface Capability
- Any Color Scheme
- Various Input Voltage and Amp options
- Any Power Cord Lengths

Currently, up to 36 output receptacles on horizontal models and 48 on vertical models.

19" Horizontal

BayTech's horizontal units come with pre-drilled holes in the sides to attach the mounting brackets using screws that come with the horizontal unit. 4 screws total (2 per side). Customer can mount unit with the front side or back side facing outwards the cabinet.

Length – 16.72 inches across on all Horizontal Rackmount options. Mounting brackets are easily installed using a Phillips screwdriver to fit the unit into a standard 19-inch rack frame.

Height – Different heights, including 1U (1.72"), 1.5U (2.595"), 2U (3.47"), and 3U (5.25").

Depth – Ranges from 3.25 inches up to 14.5 inches, depending on product capability.

Vertical

BayTech's vertically mounted units feature pre-installed tool-less mounting buttons on the rear face of the PDU, allowing the unit to be seamlessly hung inside the cabinet/rack.

Length – Array from 21.5 inches all the way up to 80 inches.

Width – Most models are ZeroU 1.97" (50mm). Also offer Vertical 2U PDUs (3.47 inches).

Depth – Ranges from 2.15 inches to 3.65 inches, depending on product capability.
